EXPERIENCE

General Assembly, New York, NY
Front-End Web Developer
January 2016 - Present

Engineered all the internal tools company uses to facilitate the email building process. Reducing build time by over 2 hours.

Maintain and develop, new features for Core API Gem Client, for both present and future client use

Work with members of the marketing team to build and design responsive landing pages and email templates

Collaborated with other members of engineering team regarding best practices and object oriented design

Developed a strong understanding of SailThru as a marketing automation platform

General Assembly, New York, NY
Teaching Assistant
September 2015 - December 2015

Assisted students and instructors in the day to day work of a 12 week intensive, web development course

Helped students complete homework and resolve coding issues in Javascript, Ruby on Rails, Node.js, MongoDB and AngularJS

Codecademy, New York, NY
Advisor
July 2015 - November 2015

Provided guidance for students in Ruby on Rails, HTML, CSS, Javascript, jQuery, PHP, Python and AngularJS

Worked with the engineering team to debug new Codecademy courses in beta before launch

As the first Advisor, I developed resources on object oriented programming, AJAX, relational databases and ruby gems for future advisors use
